## PROJECTS

### Student Welfare System

- Student Welfare System is a web application specially developed for students to facilitate easy search and ordering of food from local kitchens and hotels along with other related services. This application will help students to save time and money by eliminating the dependence on the offline facilities. The user interface (UI) of the application is developed using the React.js library and the server-side programming is done in the Spring Boot framework of Java Enterprise Edition (J2EE) along with MySQL as the database

### Dairy Management System

- The Dairy Product Management System application which deals with maintaining the inventory details of dairy product like milk, ghee, curd etc and the billing process with great ease. The owners of the dairy shop can solely depend on this application. The user interface (UI) of the application is developed using the React.js library and the server-side programming is done in the Spring Boot framework of Java Enterprise Edition (J2EE) along with MySQL as the database
